Before jumping in head first a blowing your bankroll on binary trading options, follow these simple steps and you should be in decent order going forward and have a lot of fun doing it.

- 1) What to Know Before Trading
- 2) Opening a Demo Account
- 3) Education – Learning Materials
- 4) Trade Techniques 101
- 5) Getting Your Bonus

## What to Know Before Trading

**Initial Warning:** Binary options and forex trading involve risk. *Do not bid any money you can't afford to lose PLEASE TAKE THIS SERIOUSLY.*

Results are contingent on choosing the correct direction of an asset's price, from the given strike price, by the selected expiry period. Once a trade is initiated, traders receive a confirmation screen showing the asset, strike price, the chosen direction (CALL or PUT), and the investment amount. When prompted by this screen, trades will initiate in 3 seconds unless the Trader presses the cancel button.

**Here are the numbers straight from our statistician...**

Most trades pay out up to 81% of your bid when you win, but lose about 90% of the bid when you lose. So let's say your bets win 50% of the time and lose 50% of the time, you will lose 9% overall. **Not good.** If you bet \$10.00 and you are right about the direction the currency has gone, you will win \$18.10 however. On your very next bet you are wrong with another \$10.00 bet. This means you will be left with \$1.00 from your bet. Over all you bet \$20.00 and you are left with \$19.10. This is a typical scenario. So you are losing at a 47.75% ratio. This means in order to break even you'll need to win 52.25% of the time just to break even. So normally like with all gambling or trading you are bound to lose over time, if you are running a (coin flip situation 50/50 odds). So overtime you will be right 50% off the time, which means 9% loss over time. However, this is not just like a perfect coin flip scenario (50/50), there are trends with currencies and if you follow trends and bet accordingly you can shift the scales in your favor (say 54/46) and you will come out a steady winner overtime. If you include a bonus with a (54/46) scenario, you'll do okay.

Before you learn the techniques to win over time, you will have to open a demo account, learn everything you can through TradeRush's free education material. After all this you will learn the techniques and open an account with a bonus.

## Opening a Demo Account

Click the following link and open up a demo account. After you use this link and make your first deposit you will receive a bonus, depending on how much you deposit.

We recommend you deposit the minimum \$200.00 (and you get \$50.00 bonus).

You want to start with as little as possible before until you get comfortable.

[http://binary.traderush.com/aff\\_c?offer\\_id=18&aff\\_id=31066&url\\_id=210](http://binary.traderush.com/aff_c?offer_id=18&aff_id=31066&url_id=210)

We do not recommend making a deposit right away. You need to open the account so you can gain access to some of the education material, you otherwise could not.

**Do not skip this step or you can just because you are making technical errors. Make sure you learn the platform!**

## Trade Techniques 101

Along with the free TradeRush education you must receive (and read) the Weekly market reports you receive in your email. It is imperative that you do this and follow market trends. This is how you will know what to trade.

[NOTE: Use your Demo account for practice!](#)

Please you this link religiously - <http://fx.sauder.ubc.ca/trends.html>

This is good too for historical data - <http://www.xe.com/currencycharts/>

Say you have been listening to the news and the Canadian dollar is slated to go down against the US over the next 6 months according to two reports from large Canadian banks. If you trust this information, then we know that bidding on downward trends overtime will have a higher chance of winning than not. This will help push you closer to 52/48 – **Ignore what other people are bidding, which they call “popularity” and stick with proper trends analysis overtime, Make sure to read TradeRush’s Daily Market Reports, they come via email.**

Start all your bidding low (we recommend the minimum on each bid until you are comfortable and have bank roll to play with). Make sure you starting reading everything you can about currency news and if the news explicitly says *“The US dollar has been steadily dropping against the Euro and will continue to do so for the next month one expert says”*. Then you can be confident to bet on losses every time for the USD.

While upward fluctuations will occur overtime, and you will lose some if we know for a fact the USD will drop against the Euro in the coming day, and every 30 minutes of the trading day you bid for it to drop, you are likely to win 15 of the 24 bets. Overall using this safe strategy will easily push you in the 55/45 range and with your extra bonus; you should be making profits steadily (and slowly until you build a bank roll).

**Warning: Don’t start bidding on everything under the sun, because you’ll lose overall, go with trends.**

## **Make a deposit and receive your bonus**

Now that you are ready to trade and after practicing on your demo account, make a deposit here [binary bonus for traderush.com](#) or through your account.

**Recap: Make sure you stay on top of market trends and bid accordingly. Don't just bet on your instincts, you can make some money short-term doing that but it will give you a false sense of security as statistically, you can't profit using random betting.**

**Make sure you read all education material and watch videos and make sure you follow TradeRush instructions closely.**

**Happy Earnings!**
